

H-DEX ULTRA v3.5 - ADMIN GUIDE

Official Technical Manual for Authorized Administrators Only

CRITICAL WARNING & LEGAL DISCLAIMER

This software is provided exclusively for EDUCATIONAL and AUTHORIZED SECURITY TESTING purposes. Any unauthorized use is strictly prohibited. The developer (RealMrHacker) disclaims all liability for any misuse. ABSOLUTELY NO REVENGE OR MALICIOUS USE.

1. LATEST FEATURES (v3.5 UPDATE)

A. Hardware Sensors & Control

- CPU/GPU Monitoring: Real-time temperature and model extraction via WMI.
- Audio Control: Granular system volume adjustment (0-100%).
- Brightness Control: Command-line backlight adjustment for laptops.
- Disk Usage: Live monitoring of storage partitions and usage percentages.

B. Deep Data Extraction

- Discord Token Recovery: Scans all local Discord instances for authorized tokens.
- Cookie Stealer: Recovers session cookies from Chrome-based browsers.
- Telegram Explorer: Identifies active Telegram Desktop Tdata sessions.
- Crypto Wallet Discovery: Scans for Exodus, Atomic, Electrum, and wallet.dat files.

C. Visual & System Pranks

- Fake Windows Update: Full-screen looping update animation (Working on updates 0%...).
- Screen Rotation: Instant flipping (90/180/270 degrees) for visual disruption.
- Wallpaper Injection: Real-time local-to-remote wallpaper upload and set.
