

H-DEX ULTRA v3.0 DOCUMENTATION

Official Technical Manual for Authorized Administrators Only

CRITICAL WARNING & LEGAL DISCLAIMER

This software is provided exclusively for EDUCATIONAL and AUTHORIZED SECURITY TESTING purposes. Unauthorized use against computer systems is a felony under various international laws. The developer (RealMrHacker) and his affiliates explicitly disclaim all liability for any misuse, damage, or data loss resulting from the deployment of this tool. ABSOLUTELY NO REVENGE OR MALICIOUS USE IS PERMITTED.

1. CORE CAPABILITIES

A. Stealth & Evasion

- Anti-VM: Detects VirtualBox, VMware, KVM, and Sandbox environments.
- Self-Melt: Installer securely deletes itself after target deployment.
- Critical Process: Optional BSOD trigger on unauthorized process termination.
- System Injection: Files marked with System and Hidden attributes (0x02 | 0x04).

B. Surveillance & Surveillance

- Live Stream: High-speed screen, webcam, and microphone relay.
- Data Extraction: Instant recovery of Chrome/Edge/Firefox passwords and history.
- Keylogging: Full-spectrum keystroke capture with historical logging and live feed.

C. Administrative Control

- Terminal access (PowerShell/CMD) with real-time interactive pipe.
- Comprehensive File System Management (Download/Upload/Execute).
- Registry and Policy management (Disable TaskMgr/Regedit/CMD).
