

H-DEX ULTRA: DANGER EDITION v5.0

The Ultimate Administrative Chaos & Security Suite

1. THE DANGER MODE: SYSTEM CHAOS

- Full Lockdown: Task Manager and Desktop Icons are instantly disabled.
- Atmospheric Nightmare: Injects custom wallpaper and scheduled sound effects from the 'dengraose' folder.
- Punishment Prompt: Automatically deploys a permanent instructional notepad on the client desktop.
- Recovery Mission: An interactive, multi-stage game that the client must complete to restore system normalcy.
- Jumpscare Engine: Random full-screen visual flashes to maintain psychological dominance during focus.

2. STEALTH & PERSISTENCE

- Anti-Debugging: Active detection for debuggers and VM analysts; the process terminates instantly if detected.
- Registry Persistence: Automatically sets up as a 'Windows Health Monitor' in the current user's auto-run registry.
- Discord Bot Integration: Full /danger command support for remote chaos management from any mobile device.
- Admin Dashboard Guard: Direct Danger Mode triggers added to both the Prank and Admin Tools tabs.

3. ADVANCED DATA RECOVERY (v5.0)

- Credit Card Extractor: Deep scan for browser-saved payment methods.
- Registry God-Mode: Full control over HKLM, HKCU, and critical system hives.
- Master Discovery: Identifying all browser extensions, local users, and network topology.

FOR AUTHORIZED ADMINISTRATIVE & SECURITY TESTING ONLY.
